

Australian Automotive Components and Sprintex Superchargers are proud to announce their appointment as **Exclusive Distributor to the Automotive & Motor Sport Market** in Australia and New Zealand for **MILITEC-1** products, imported by [Friction Technology Pty Ltd](#)

### **WHAT IS MILITEC-1?**

**MILITEC-1** is a High Performance Metal Conditioner that can be added to your engine, gearbox, automatic transmission and differential to reduce Friction and Wear and to increase Performance and Horsepower.

Even though **MILITEC-1** is added to the oil, it is **not** an oil additive. **MILITEC-1** contains no viscosity enhancers or other oil augmentation compounds. It does not modify the primary lubricant in any way. Instead, **MILITEC-1** is a **metal conditioner**. **MILITEC-1** simply uses the circulating oil as a means to reach the critical hot spots and metallic friction surfaces within the machinery. When the oil carries **MILITEC-1** to these areas, **MILITEC-1** exits the oil, leaving the oil completely unaffected and unchanged.

### **BENEFITS OF MILITEC-1**

- Reduction of harmful tailpipe emissions in all gasoline, Diesel and two cycle engines
- 24 hour lubrication to all metal surfaces
- Reduced operating temperatures at all metal friction points
- Increased power using the same energy
- Reduced oxidation, thermal decomposition, corrosion and wear
- Greater efficiency in electric motors, alternators and generators
- Less energy required in engine start-ups, regardless of weather conditions
- Does not adversely affect the viscosity of the primary lubricant
- Long lasting - Remains bonded to metal surfaces even after several oil changes
- Protects for extended periods even if primary lubricant is lost, or is contaminated by fuel, anti-freeze or combustion by-products
- Reduces material build-up. Contaminants and wear metals cannot adhere to **MILITEC-1** protected surfaces.

### **PRICING**

<b>MILITEC-1 Bottle Size</b>	<b>RRP AUD\$ (Inc GST)</b>
<b>30ml</b>	<b>\$12.95</b>
<b>120ml</b>	<b>\$29.95</b>
<b>250ml</b>	<b>\$49.45</b>
<b>500ml</b>	<b>\$83.25</b>
