

SUPER MAGNA

Supercharger bridges Magna's power gap

■ Want more AWD Magna? Get a supercharger kit. Perth-based Sprintex has developed a bolt-on blower to mount in the V6's bank and performance is blatant. Power rises 30 percent, from 159kW to a V8-esque 226kW. Torque jumps 25 percent to 422Nm. The figures below show how much faster it is, and that's despite the 18-inch alloys on the Sprintex demo car.

At \$7645, it's a great option for both the AWD and FWD Magnas because while not officially endorsed, the kit is recognised by Mitsubishi which will maintain a new car's warranty. Contact Sprintex on (08) 9262 7222.

MAGNA AWD	POWER/TORQUE	0-100KM/H	0-400M
STANDARD	159kW/318Nm	8.6sec	16.4 @ 142km/h
SPRINTEX	226kW/422Nm	7.1sec	15.1 @ 151km/h
